

Pro 3D Printer

Ready for Today, Built for Tomorrow

Capable

A breakthrough projector and resin tank combined with a larger build platform enable unprecedented throughput.

Easy

Easily close intraoral scans without the need for third-party software. Auto-detect issues before you print.

Advanced

Onboard help, over-the-air updates, and an advanced touchscreen computer that can print directly from a USB drive.

SprintRay Pro

The New Industry Standard

3D printing in dentistry is much more than just a new technology: it has the potential to control costs, improve flexibility, and expand the scope of patient care. To deliver on this potential, we made SprintRay Pro the most user-friendly, powerful and reliable desktop printer in dentistry. Because the technology in your office needs to solve problems, not create headaches.

Industrial Volume

Enough throughput to handle the largest jobs. SprintRay Pro features a larger build platform (18cm x 12 cm surface area) than its competitors while maintaining its desktop form factor.

Up to 21 Arches

Intensity, Meet Accuracy

The custom projector in SprintRay Pro delivers high-intensity light evenly across the build surface for perfect, accurate prints every time.

405nm LED 95µm Projector

Unprecedented Speed

With industry-first advances in projector technology, SprintRay Pro is up to three times faster than its predecessor while offering improved accuracy.

Up to 3x Faster

Breakthrough Tech, Breakneck Speed

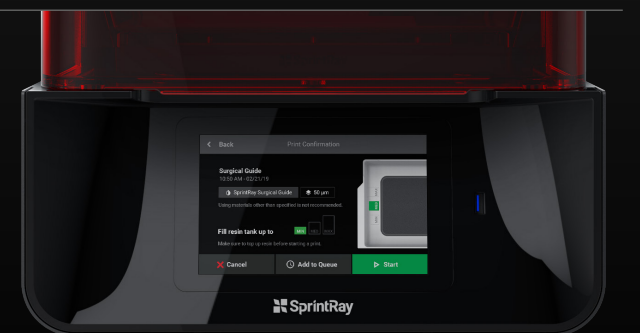

Cutting-edge advancements in tank materials unlock huge gains in speed, along with at least twice the tank lifetime for added reliability.

Up to 50 Liters Lifetime

Brains Behind the Brawn

Intuitive touchscreen controls and contextual instructions managed by a 6-core CPU make learning curves a thing of the past. Start print jobs directly from front panel USB port.

Onboard Assistant

Resin Agnostic

Choose the materials that are best for your applications. SprintRay Pro offers a wide variety of tested, verified resins from 3rd party vendors and we're always adding new options.

Dental Models

Surgical Guides

Dentures

Impression Trays

Night Guards

Removable Dies

Indirect Bonding Trays

SprintRay Software

Automatically convert intraoral scans to full models, ready for printing. Add labels to model supports. SprintRay Software automates the frustrations away from dental 3D printing.

Pro Cure

Pro Cure uses powerful LED arrays and convection heating to make post-processing a snap. Pre-programmed with settings for most popular resins.
